

Monthly Cycles (Archetypes) for 2004

I used my intuition to tune into the energy patterns for the months of 2004. This is based on the positioning of the planets in each particular month. The reader can use these **Archetypal Themes** that are shown as titles for each month as a guide to perhaps plan for the future. Of course, to get a better feel for what's coming in your life, there is nothing like getting a **Personalized Reading** of your own Astrological Chart, constructed from your date, time and place of birth.

I have listed the astrological events that most influenced my interpretations, just in case you are an astrologer or have above average knowledge of the subject. You don't need any expertise to read the following monthly descriptions, as they are in plain English!

2004

January: Month for Dreaming a New Dream

**** Venus Conjunct Neptune in Aquarius ****

**** Jupiter square Pluto ****

Don't be afraid to think big. You can edit the plan later. Have a wider scope that can be brought into focus. The Universe is sending, or maybe it's better to say, beaming great inspiration!

February: Month for sudden change of directions

**** Venus in Aries ****

**** Mercury in Aquarius ****

**** North Node square Neptune ****

Whatever you thought was going to happen probably isn't. Be ready to flow with life's ups and downs. Your inner faith is required as a prerequisite to getting the best out of life. Past life energies for many of us are burning to be expressed.

March: Month for not looking back

**** Jupiter quincunx Neptune ****

**** Mars in Gemini ****

**** Mercury in Aries ****

**** Mars square Uranus ****

Look before you leap! This year's energies continue to encourage a faster pace than some of the previous ones. Pace yourself. There's still a lifetime ahead of you. Pay attention to those you love. Taking care of some details now, stops them from snowballing later.

April: Month for taking a Creative Risk

**** Mars oppose Pluto ****

**** Venus oppose Pluto ****

**** Mercury in Aries (and Retrograde!) ****

Is your mind extra restless? Do you think your soul is trying to tell you something? I'll bet the answer is yes to both questions! The universe is trying to give you a Cosmic push to test your talents. Expanding a life direction is certainly possible. Reach back for confidence. Patience will take you far. Don't let others talk you out of exploring a subject of interest. The world might be waiting for you to display your ability. Get on with it!

Past issues from this life and a few previous incarnations need not get in your way. It's possible to work on your inner issues and still forge ahead like a warrior. Choose your battles wisely. The spirit of competition is strongly in the Collective breezes. Win over your opponents through reason more than by sheer force of will.

May: Month for Intuitive Impulses

**** Mars conjunct Saturn in Cancer ****

**** Mars trine Uranus ****

**** Mercury square Neptune ****

**** Sun square Neptune ****

**** Mercury conjunct North Node ****

There is a lot of excitement in the air. The Cosmic Forces are playing a loud drumbeat, one that is calling to your intuition. Use your best judgment in timing a major move. Your positive beliefs can have more power than usual. Don't try to control what's in front of you. But, rather step back and think things through. An interesting month in that some of our impulses might be to rely more heavily on our favorite comfort zones. Other instincts could motivate us to suddenly feel to take our best shot in a direction that is exhilarating. The universe is pouring a century of wisdom down upon us. Use it to make a more abundant life!

If you feel stuck in the past or weighted down by problems, try to take a trip. Exercise your mental ingenuity. Or at least get a break from what's bothering you. Refreshing your psyche through pleasurable escapes isn't a bad idea. If you like to work, the good news is that this is a month that strongly supports that as well. Balance business and pleasure if you want to be a happy person!

June: Month for rethinking the Big Plans

**** Saturn quincunx Neptune ****

**** Venus square Uranus ****

**** Jupiter quincunx Neptune ****

**** Mars quincunx Neptune ****

**** Jupiter sextile Saturn ****

Take small steps and see if they lead to bigger ones. You might be wondering if the future will fulfill your hopes and wishes. Rather than waiting, put your best foot forward. Collective energies are at work, mysteriously guiding us to reach for a bigger self-understanding. They are saying something else as well: to be reasonable in what you want.

This is a month when the energies of the universe are encouraging meditation. Be reflective. Then act. Don't blame others if things are not going according to plan. It's better to go back to the drawing board and take another look at a plan. It might only need a little refining.

Divine discontent is the thing to watch out for so that you don't get very confused. There are different cycles operation that stimulate our intuition but not always our best conscious awareness. If you move with an open mind, with some integrity and a sincere desire to do good works, the world will be yours for the taking!
